(57) Abstract: The present invention relates to a user interface for a multimedia device having means for navigating within a plurality of multimedia files and/or means for changing a playback order. According to the invention, the user interface includes means for changing the sorting order and/or playback order of the plurality of multimedia files, whereby upon changing the sorting order and/or playback order of the multimedia files the currently selected multimedia file is kept and the new sorting order and/or playback order is determined by at least one property of the currently selected multimedia file.
